HOSTED SOLUTIONS

To: All SmartCabinet™ Customers
From: Your DocClarity Support Team
Subject: Release of SmartCabinet 4.5
Date: December 15, 2006

On behalf of our entire team we are very pleased and excited to announce our latest release of SmartCabinet™. SmartCabinet™ v. 4.5 continues to expose and build upon key functionality of our award winning core technology, the Stellent Content Server. Our goal is simple, “to be your transparent and seamless one source provider of leading edge hosted content management deliverables, allowing you to affordably and efficiently capture, access, manage and store the content you use to run your business”.

The following enhancements will be provided **at no additional charge**:

1. Workflow – establishes an approval process for active content. Route critical content to individuals or teams for approval and signoff prior to publishing.
2. .msg to .pdf – Support of email file conversions at check in.
3. Dynamic Watermarking – SmartCabinet™ can add a watermark to PDF files as they are viewed, printed, or saved by users.
4. Firefox Compatibility – we now support Microsoft IE and Mozilla Firefox.
5. Cancel All Remaining Date Notifications – SmartCabinet can now cancel all remaining date notifications for specific content
6. Track Content Move – SmartCabinet will now provide audit trails of documents movement within SmartCabinet.
7. New Calendar Look – changes will provide easier and quicker entry of data when running reports, etc.
8. Suggestion Link – We want your suggestions on ways to continue enhancing SmartCabinet.
9. Plus numerous minor changes!

Each System Administrator will be contacted to discuss their rollout for their users.
